

Your First Robot Pet

Have some fun building your first Robot Pet! What do you want to name your pet? Think of a name...

Step 1 of 7

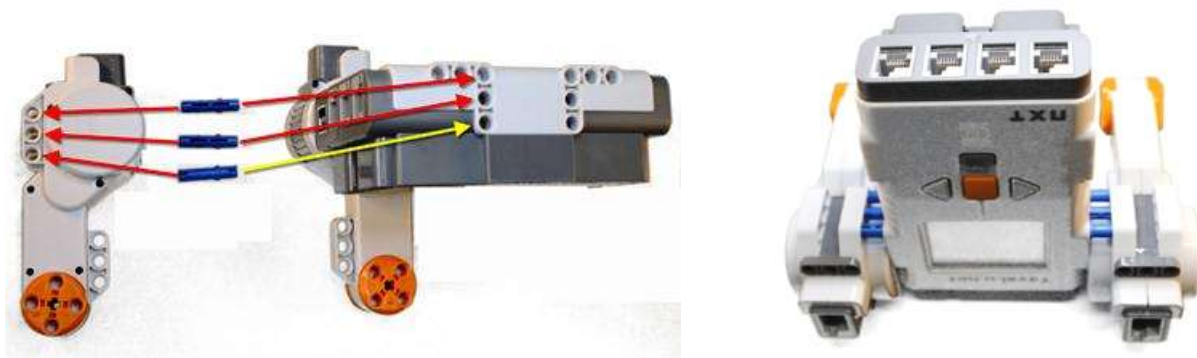

Find one computer brick, three long blue connectors, and one motor. Put them together.

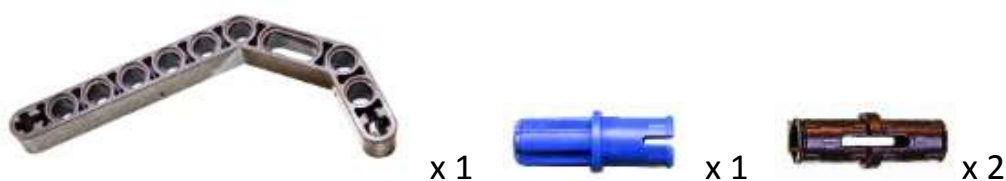

Step 2 of 7

Find three more long blue connectors, and another motor. Put them together.

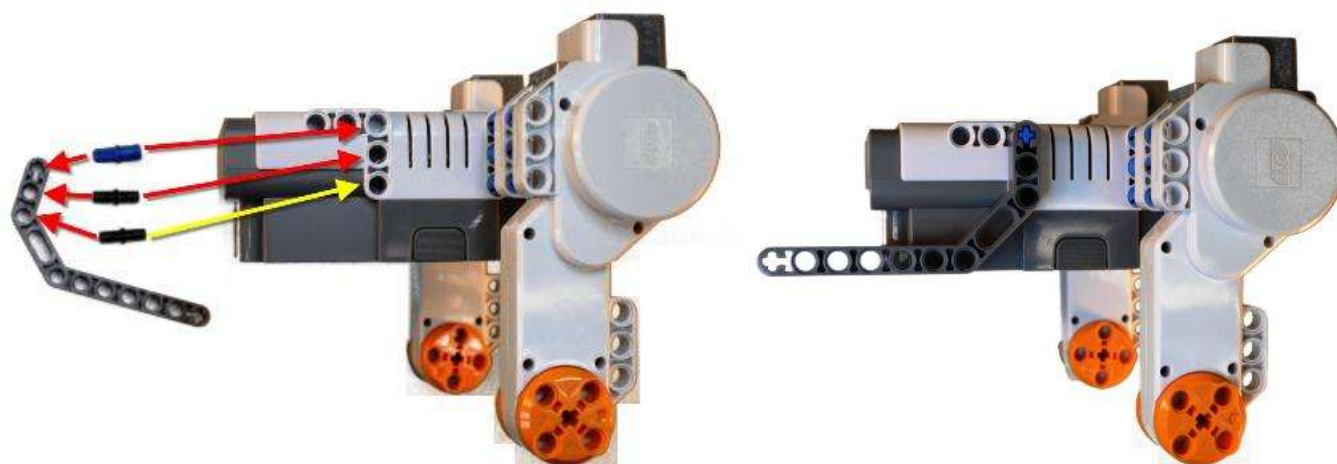

Step 3 of 7

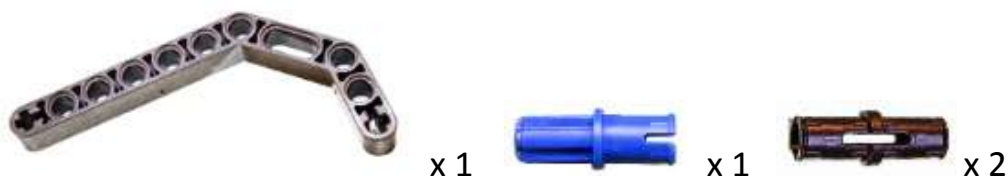

Find one double bent beam, one short blue connector, and two short black connectors.

Step 3 of 7 (continued)

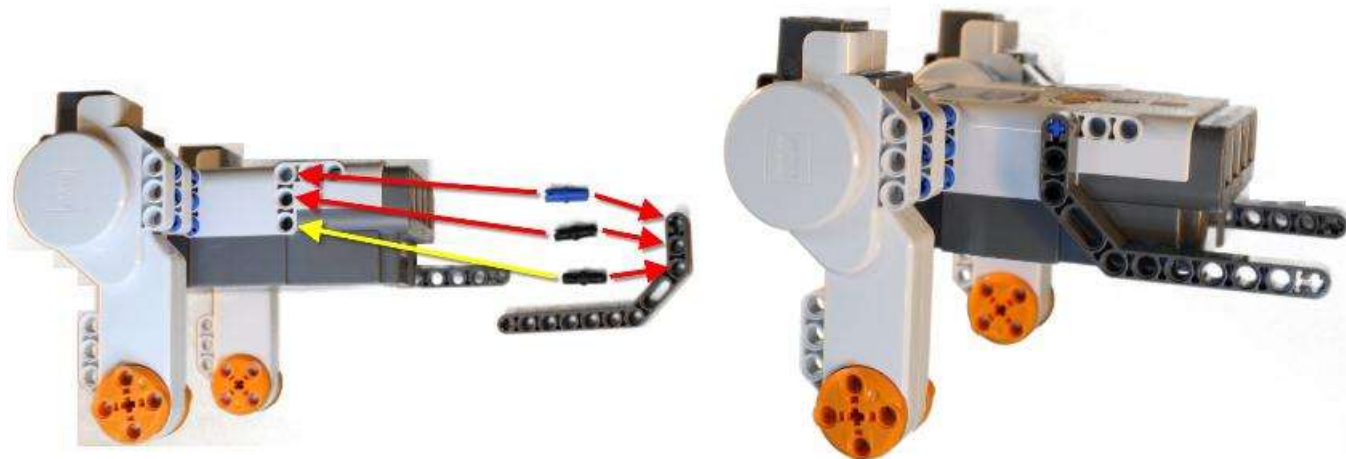

Connect the beam and the three connectors to your robot as shown in the diagrams below.

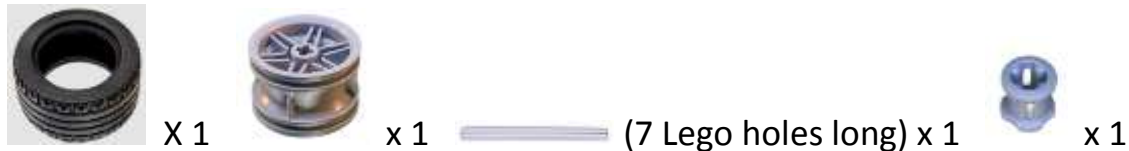

Step 4 of 7

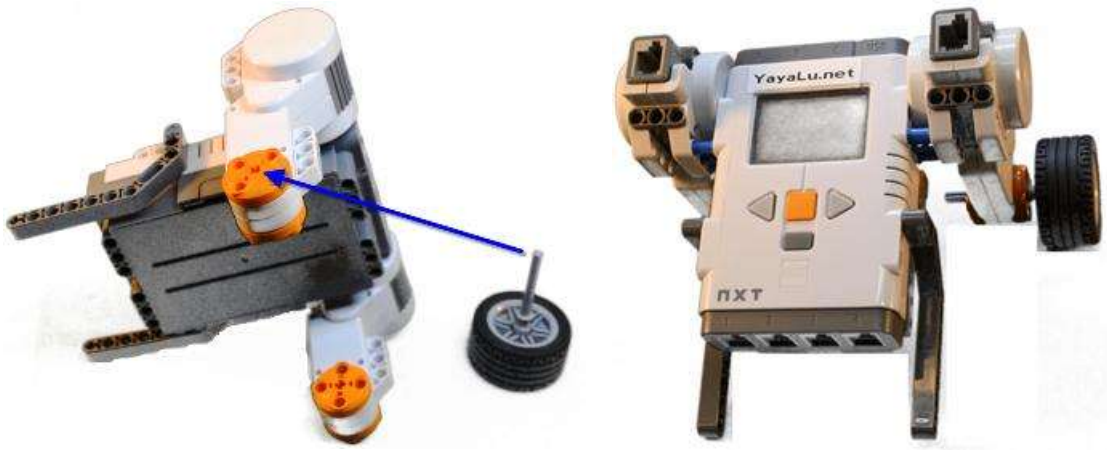

Find one double bent beam, one short blue connector, and two short black connectors. Connect the beam and the three connectors to your robot as shown in the diagrams below.

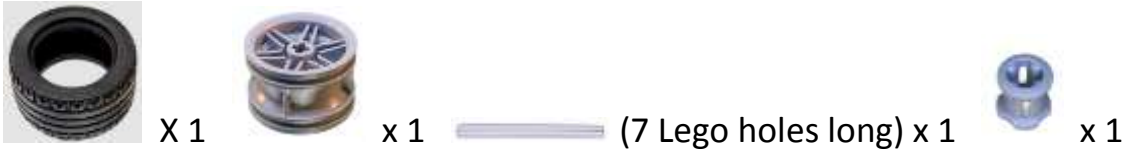

Step 5 of 7

Find the tyre, wheel hub, axle and bushing. Put them together, as shown on the next page.

Step 6 of 7

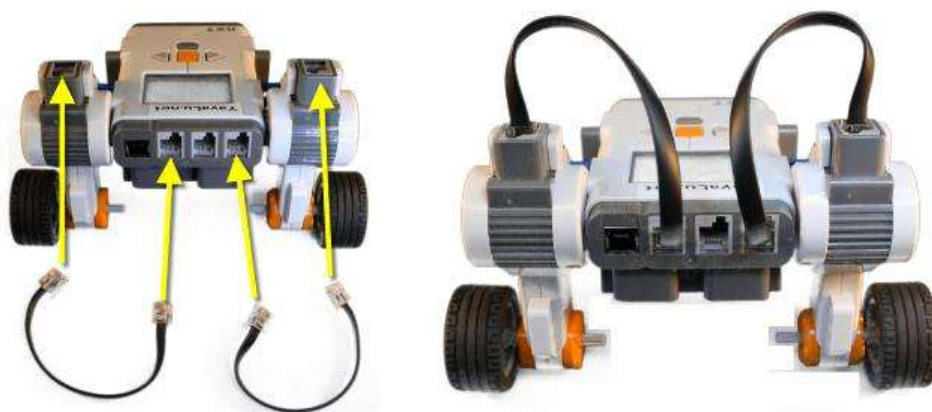

Find the tyre, wheel hub, axle and bushing. Put them together as shown below.

Step 7 of 7

Find the cables, and use them to connect the computer brick and motors, as shown below.

Finished - Good work!
